

THE RADIONIC ASSOCIATION

Radionic Instruments Available to Purchase

DT10 - £30.00

The DT10 is a small effective instrument which is sufficient to cover the range of treatments at this introductory level.

DT10 instruments are available to purchase for £30.00

Base 10 Dial Instrument - £495.00*

The Base 10 Dial Instrument can be used for analysis, treatment and making remedies.

It is available to purchase for £495.00, with an optional carry case at a price of £45.00.

Optional Carry Case -
£45.00*

*Discounted price only for our Diploma students: £375.00, with an optional carry case for £30.00. There is an option to purchase this in instalments for those who continue on to the Diploma course.

Energea Digital Instrument - £495.00*

The Energea radionic instrument is a small portable, electronic radionic instrument, is extremely easy to use, requires no maintenance and comes with a guarantee for 1 year.

It performs the same functions as existing radionic instruments, but has been digitised to provide a more precise signal. In analysis mode, it will enable the practitioner using radiesthesia to find the best rate and will be a mainstay in any radionic practice.

Optional Carry Case -
£20.00

*Discounted price only for our Diploma students: £420.00. There is an option to purchase this in instalments for those who continue on to the Diploma course.
